

ABCF1 抗原（重组蛋白）

中文名称：ABCF1 抗原（重组蛋白）

英文名称：ABCF1 Antigen (Recombinant Protein)

别名：ATP-binding cassette, sub-family F (GCN20), member 1; ABC27; ABC50

储存：冷冻（-20℃）

相关类别：抗原

概述：

Fusion protein corresponding to a region derived from 625-840 amino acids of human ABCF1

技术规格：

Full name:	ATP-binding cassette, sub-family F (GCN20), member 1
Synonyms:	ABC27; ABC50
Swissprot:	Q8NE71
Gene Accession:	BC034488
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	The protein encoded by this gene is a member of the superfamily of ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, White). This protein is a member of the GCN20 subfamily. Unlike other members of the superfamily, this protein lacks the transmembrane domains which are characteristic of most ABC transpo

rters. This protein may be regulated by tumor necrosis factor-alpha and play a role in enhancement of protein synthesis and the inflammation process.
