

Anti-CD151 antibody

Cat. No.	ml220490
Package	25 µl/100 µl/200 µl
Storage	-20°C, pH7.4 PBS, 0.05% NaN ₃ , 40% Glycerol

Product overview

Description	Anti-CD151 rabbit polyclonal antibody
Applications	ELISA, IHC
Immunogen	Fusion protein of human CD151
Reactivity	Human, Mouse, Rat
Content	0.8 mg/ml
Host species	Rabbit
Ig class	Immunogen-specific rabbit IgG
Purification	Antigen affinity purification

Target information

Symbol	CD151
Full name	Cluster of Differentiation 151 antigen
Synonyms	GP27, MER2, RAPH, SFA1, PETA-3, TSPAN24
Swissprot	P48509

Target Background

The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is a cell surface glycoprotein that is known to complex with integrins and other transmembrane 4 superfamily proteins. It is involved in cellular processes including cell adhesion and may regulate integrin trafficking and/or function. This protein enhances cell motility, invasion and metastasis of cancer cells. Multiple alternatively spliced transcript variants that encode the same protein have been described for this gene.

Applications

Immunohistochemistry

Predicted cell location: Cytoplasm, Cell membrane

Positive control: Human liver cancer

Recommended dilution: 10-50

The image on the left is immunohistochemistry of paraffin-embedded Human liver cancer tissue using ml220490(CD151 Antibody) at dilution 1/10, on the right is treated with fusion protein. (Original magnification: ×200)

ELISA

Recommended dilution: 500-2000
