

Anti-DIDO1 antibody

Cat. No.	ml222204
Package	25 µl/100 µl/200 µl
Storage	-20°C, pH7.4 PBS, 0.05% NaN ₃ , 40% Glycerol

Product overview

Description	Anti-DIDO1 rabbit polyclonal antibody
Applications	ELISA, IHC
Immunogen	Fusion protein of human DIDO1
Reactivity	Human
Content	0.5 mg/ml
Host species	Rabbit
Ig class	Immunogen-specific rabbit IgG
Purification	Antigen affinity purification

Target information

Symbol	DIDO1
Full name	death inducer-obliterator 1
Synonyms	BYE1; DIO1; DATF1; DIDO2; DIDO3; DIO-1; DATF-1; C20orf158; dJ885L7.8
Swissprot	Q9BTC0

Target Background

Apoptosis, a major form of cell death, is an efficient mechanism for eliminating unwanted cells and is of central importance for development and homeostasis in metazoan animals. In mice, the death inducer-obliterator-1 gene is upregulated by apoptotic signals and encodes a cytoplasmic protein that translocates to the nucleus upon apoptotic signal activation. When overexpressed, the mouse protein induced apoptosis in cell lines growing in vitro. This gene is similar to the mouse gene and therefore is thought to be involved in apoptosis. Alternatively spliced transcripts have been found for this gene, encoding multiple isoforms.

Applications

Immunohistochemistry

Predicted cell location: Cytoplasm or Nucleus
Positive control: Human thyroid cancer
Recommended dilution: 100-300

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using ml222204(DIDO1 Antibody) at dilution 1/50, on the right is treated with fusion protein. (Original magnification: ×200)

Predicted cell location: Cytoplasm or Nucleus
Positive control: Human cervical cancer
Recommended dilution: 100-300

The image on the left is immunohistochemistry of paraffin-embedded Human cervical cancer tissue using ml222204(DIDO1 Antibody) at dilution 1/50, on the right is treated with fusion protein. (Original magnification: ×200)

ELISA

Recommended dilution: 2000-10000
