

Anti-MFAP3L antibody

| | |
|-----------------|---|
| Cat. No. | ml222678 |
| Package | 25 µl/100 µl/200 µl |
| Storage | -20°C, pH7.4 PBS, 0.05% NaN ₃ , 40% Glycerol |

Product overview

| | |
|---------------------|--|
| Description | Anti-MFAP3L rabbit polyclonal antibody |
| Applications | ELISA, IHC |
| Immunogen | Fusion protein of human MFAP3L |
| Reactivity | Human, Mouse, Rat |
| Content | 0.4 mg/ml |
| Host species | Rabbit |
| Ig class | Immunogen-specific rabbit IgG |
| Purification | Antigen affinity purification |

Target information

| | |
|------------------|--|
| Symbol | MFAP3L |
| Full name | microfibrillar-associated protein 3-like |
| Synonyms | NYD-sp9 |
| Swissprot | O75121 |

Target Background

MFAP3L (microfibrillar-associated protein 3-like), also known as HSD39 or testis development protein NYD-SP9, is a 409 amino acid single-pass type I cell membrane protein that contains one Ig-like (immunoglobulin-like) domain. Found primarily in testis, MFAP3L is encoded by a gene that is located on chromosome 4 and is expressed as three isoforms due to alternative splicing events. Representing approximately 6% of the human genome, chromosome 4 contains nearly 900 genes, one of which is the Huntingtin gene, which is found to encode an expanded glutamine tract in cases of Huntington's disease.

Applications

Immunohistochemistry

Predicted cell location: Cytoplasm

Positive control: Human esophagus cancer

Recommended dilution: 50-200

The image on the left is immunohistochemistry of paraffin-embedded Human esophagus cancer tissue using ml222678(MFAP3L Antibody) at dilution 1/50, on the right is treated with fusion protein. (Original magnification: ×200)

ELISA

Recommended dilution: 2000-5000
