

Anti-PARL antibody

 Cat. No.
 ml222837

 Package
 25 μl/100 μl/200 μl

 Storage
 -20°C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Anti-PARL rabbit polyclonal antibody
ELISA, IHC
Fusion protein of human PARL
Human, Mouse, Rat
0.2 mg/ml
Rabbit
Immunogen-specific rabbit IgG
Antigen affinity purification
mark the second s
PARL
presenilin associated, rhomboid-like
PSARL; PSARL1; RHBDS1; PRO2207; PSENIP2

Q9H300

,000

Target Background

Swissprot

This gene encodes a mitochondrial integral membrane protein. Following proteolytic processing of this protein, a small peptide (P-beta) is formed and translocated to the nucleus. This gene may be involved in signal transduction via regulated intramembrane proteolysis of membrane-tethered precursor proteins. Variation in this gene has been associated with increased risk for type 2 diabetes. Alternative splicing results in multiple transcript variants encoding different isoforms.

Applications Immunohistochemistry

ELISA

Predicted cell location: Cytoplasm Positive control: Human thyroid cancer Recommended dilution: 25-100

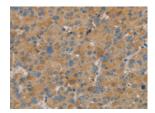

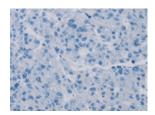

Recommended dilution: 1000-2000

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using ml222837(PARL Antibody) at dilution 1/20, on the right is treated with fusion protein. (Original magnification: ×200)

Predicted cell location: Cytoplasm Positive control: Human liver cancer Recommended dilution: 25-100

The image on the left is immunohistochemistry of paraffin-embedded Human liver cancer tissue using ml222837(PARL Antibody) at dilution 1/20, on the right is treated with fusion protein. (Original magnification: ×200)
