

Anti-PILRB antibody

Cat. No.	ml222877
Package	25 µl/100 µl/200 µl
Storage	-20°C, pH7.4 PBS, 0.05% NaN ₃ , 40% Glycerol

Product overview

Description	Anti-PILRB rabbit polyclonal antibody
Applications	ELISA, IHC
Immunogen	Fusion protein of human PILRB
Reactivity	Human
Content	0.2 mg/ml
Host species	Rabbit
Ig class	Immunogen-specific rabbit IgG
Purification	Antigen affinity purification

Target information

Symbol	PILRB
Full name	paired immunoglobulin-like type 2 receptor beta
Synonyms	FDFACT1; FDFACT2
Swissprot	Q9UKJ0

Target Background

The paired immunoglobulin-like type 2 receptors consist of highly related activating and inhibitory receptors that are involved in the regulation of many aspects of the immune system. The paired immunoglobulin-like receptor genes are located in a tandem head-to-tail orientation on chromosome 7. This gene encodes the activating member of the receptor pair and contains a truncated cytoplasmic tail relative to its inhibitory counterpart (PILRA), that has a long cytoplasmic tail with immunoreceptor tyrosine-based inhibitory (ITIM) motifs.

Applications

Immunohistochemistry

Predicted cell location: Cytoplasm or Cell membrane

Positive control: Human liver cancer

Recommended dilution: 20-100

The image on the left is immunohistochemistry of paraffin-embedded Human liver cancer tissue using ml222877(PILRB Antibody) at dilution 1/20, on the right is treated with fusion protein. (Original magnification: $\times 200$)

ELISA

Recommended dilution: 1000-2000
