技术规格

Background:	This gene encodes type I adenylate cyclase activating polypeptide receptor, which is a membrane-associated protein and shares significant homology with members of the glucagon/secretin receptor family. This receptor mediates diverse biological actions of adenylate cyclase activating polypeptide 1 and is positively coupled to adenylate cyclase. Multiple alternatively spliced transcript variants encoding distinct isoforms have been identified.
Applications:	ELISA, WB, IHC
Name of antibody:	ADCYAP1R1
Immunogen:	Synthetic peptide of human ADCYAP1R1

Full name:	Adenylate cyclase activating polypeptide 1 (pituitary) receptor type I
