技术规格

Background:	The protein encoded by this gene is a Src binding partner. It may represent a potential modulator of actin filament integrity in response to cellular signals, and may function as an adaptor protein by linking Src family members and/or other signaling proteins to actin filaments. Multiple transcript variants encoding different isoforms have been found for this gene.
Applications:	ELISA, WB, IHC
Name of antibody:	AFAP1
Immunogen:	Fusion protein of human AFAP1
Full name:	Actin filament associated protein 1

Synonyms :	AFAP; AFAP110; AFAP-110
SwissProt:	Q8N556
ELISA Recommended dilution:	1000-2000
IHC positive control:	Human breast cancer and human esophagus cancer
IHC Recommend dilution:	25-100
WB Predicted band size:	81 kDa
WB Positive control:	A172 cells
WB Recommended dilution:	200-1000
