技术规格

Background:	This gene encodes one of the multiple subunits of the RNA polymerase III transcription factor complex required for transcription of genes with promoter elements upstream of the initiation site. The product of this gene, a TFIIB-like factor, is directly recruited to the TATA-box of polymerase III small nuclear RNA gene promoters through its interaction with the TATA-binding protein.
Applications:	ELISA, IHC
Name of antibody:	BRF2
Immunogen:	Fusion protein of human BRF2

Full name:	BRF2, RNA polymerase III transcription initiation factor 50 kDa subunit
Synonyms:	BRFU; TFIIB50
SwissProt:	Q9HAW0
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human thyroid cancer and human cervical cancer
IHC Recommend dilution:	25-100
