## 技术规格

**Background:** 

This gene is a member of the H/ACA snoRNPs (sma II nucleolar ribonucleoproteins) gene family. snoRNPs are involved in various aspects of rRNA processing and modification and have been classified into two families: C/D and H/ACA. The H/ACA snoRNPs also i nclude the NOLA1, 2 and 3 proteins. The protein en coded by this gene and the three NOLA proteins lo calize to the dense fibrillar components of nucleoli and to coiled (Cajal) bodies in the nucleus. Both 18 S rRNA production and rRNA pseudouridylation are impaired if any one of the four proteins is depleted.
