## 技术规格

Background:	Many vertebrate homeo box-containing genes have bee
	n identified on the basis of their sequence similarity wit
	h Drosophila developmental genes. Members of the Dlx
	gene family contain a homeobox that is related to that
	of Distal-less (DII), a gene expressed in the head and li
	mbs of the developing fruit fly. The Distal-less (Dlx) fam
	ily of genes comprises at least 6 different members, DL
	X1-DLX6. Trichodentoosseous syndrome (TDO), an autos
	omal dominant condition, has been correlated with DLX
	3 gene mutation.
Applications:	WB, IHC
