技术规格

Background:	The protein encoded by this gene is a serine-threonine kinase that is closely related to other kinases that interact with members of the Rho family of small GTPases. Substrates for this enzyme include myogenin, the beta-subunit of the L-type calcium channels, and phospholemman. The 3' untranslated region of this gene contains 5-37 copies of a CTG trinucleotide repeat.
Applications:	WB
Name of antibody:	DMPK
Immunogen:	Synthesized peptide derived from N-terminal of human DMPK.

Full name:	dystrophia myotonica-protein kinase
Synonyms :	DM; DM1; DMK; MDPK; DM1PK; MT-PK
SwissProt:	Q09013
WB Predicted band size:	69 kDa
WB Positive control:	Jurkat cells and COLO205 lysates
WB Recommended dilution:	500-3000
