

兔抗 CDKN2AIPNL 多克隆抗体

中文名称：兔抗 CDKN2AIPNL 多克隆抗体

英文名称：Anti-CDKN2AIPNL rabbit polyclonal antibody

别名：CDKN2A interacting protein N-terminal like

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：CDKN2AIPNL

反应种属：Human, Mouse, Rat

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

CDKN2AIPNL (CDKN2A interacting protein N-terminal like) is a 116 amino acid protein that belongs to the CARF family. Existing as two alternatively spliced isoforms, CDKN2AIPNL is encoded by a gene that maps to human chromosome 5q31.1. Chromosome 5 contains 181 million base pairs and comprises nearly 6% of the human genome. Chromosome 5 is associated with Cockayne syndrome through the ERCC8 gene and familial adenomatous polyposis through the adenomatous polyposis coli (APC) tumor suppressor gene. Treacher Collins syndrome is also chromosome 5-associated and is caused by insertions or deletions within the TCOF1 gene. Deletion of the p arm of chromosome 5 leads to Cri du chat syndrome, while deletion of the q arm or of chr

	romosome 5 altogether is common in therapy-related acute myelogenous leukemias and myelodysplastic syndrome.
Applications:	ELISA, IHC
Name of antibody:	CDKN2AIPNL
Immunogen:	Full length fusion protein
Full name:	CDKN2A interacting protein N-terminal like
SwissProt:	Q96HQ2
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human colorectal cancer and Human gastric cancer
IHC Recommend dilution:	25-100
