

兔抗 FCER1A 多克隆抗体

中文名称：兔抗 FCER1A 多克隆抗体

英文名称：Anti-FCER1A rabbit polyclonal antibody

别名：FCE1A; FcERI

相关类别：一抗

储存：冷冻（-20℃）避光

宿主：Rabbit

抗原：FCER1A

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

Fc fragment of IgE, high affinity I, receptor for, alpha polypeptide, also known as high affinity immunoglobulin epsilon receptor subunit alpha, FCER1A and FCE1A, is a single-pass type I membrane protein which contains 2 immunoglobulin-like domains. FCER1A is a subunit of the IgE receptor, which is composed of one glycosylated alpha (FCER1A), one beta (FCER1B), and two gamma (FCER1G) subunits. The high affinity IgE receptor plays a central role in allergic disease, coupling allergen and mast cell to initiate the inflammatory and immediate hypersensitivity responses that are characteristic of disorder

	ders such as hay fever and asthma.
Applications:	WB
Name of antibody:	FCER1A
Immunogen:	Fusion protein of human FCER1A
Full name:	Fc fragment of IgE, high affinity I, receptor for; alpha polypeptide
Synonyms :	FCE1A; FcERI
SwissProt:	P12319
WB Predicted band size:	30 kDa
WB Positive control:	Mouse spleen tissue
WB Recommended dilution:	500-2000
