

兔抗 FGFR1OP2 多克隆抗体

中文名称：兔抗 FGFR1OP2 多克隆抗体

英文名称：Anti-FGFR1OP2 rabbit polyclonal antibody

别名：WIT3.0; HSPC123-like

相关类别：一抗

抗原：FGFR1OP2

储存：冷冻（-20℃）

宿主：Rabbit

反应种属：Human, Mouse, Rat

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

Acidic and basic fibroblast growth factors (FGFs) are members of a family of multifunctional polypeptide growth factors that stimulate proliferation of cells of mesenchymal, epithelial and neuroectodermal origin. Like other growth factors, FGFs act by binding and activating specific cell surface receptors which include the FGF receptor (FGFR-1) and the Bek receptor (FGFR-2), as well as FGFR-3, FGFR-4, FGFR-5 and FGFR-6. FGFR1OP2 (FGFR1 oncogene partner 2), also known as HSPC123, is a 253 amino acid cytoplasmic protein that is expressed in spleen, thymus and bone marrow and is inv

	olved in wound healing under normal cellular conditions. Additionally, FGFR1OP2 may also exist as an aberrant fusion protein with Flg and it is thought that the FGFR1OP2-Flg mutant may play a role in the pathogenesis of stem cell myeloproliferative disorder (MPD). Multiple isoforms of FGFR1OP2 exist due to alternative splicing events.
Applications:	ELISA, IHC
Name of antibody:	FGFR1OP2
Immunogen:	Fusion protein of human FGFR1OP2
Full name:	FGFR1 oncogene partner 2
Synonyms :	WIT3.0; HSPC123-like
SwissProt:	Q9NVK5
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human colon cancer
IHC Recommend dilution:	50-200
