

RBM10 抗原（重组蛋白）

中文名称：RBM10 抗原（重组蛋白）

英文名称：RBM10 Antigen (Recombinant Protein)

别名：S1-1; TARPS; GPATC9; ZRANB5; GPATCH9; DXS8237E

储存：冷冻（-20℃）

相关类别：抗原

概述：

Fusion protein corresponding to a region derived from 731-930 amino acids of human RBM10

技术规格：

Background:	This gene encodes a nuclear protein that belongs to a family of proteins that contain an RNA-binding motif. The encoded protein associates with hnRNP proteins and may be involved in regulating alternative splicing. Defects in this gene are the cause of the X-linked recessive disorder, TARP syndrome. Alternate splicing results in multiple transcript variants.
Tags:	His tag C-Terminus, GST tag N-Terminus
Expression system:	Escherichia coli
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Gene Accession:	BC004181
Swissprot:	P98175
Synonyms:	S1-1; TARPS; GPATC9; ZRANB5; GPATCH9; DXS8237E
Full name:	RNA binding motif protein 10
