

ANXA13 抗原（重组蛋白）

中文名称：ANXA13 抗原（重组蛋白）

英文名称：ANXA13 Antigen (Recombinant Protein)

储存：冷冻（-20℃）

相关类别：抗原

概述

Fusion protein corresponding to a region derived from 56-316 amino acids of human ANXA13

技术规格

Full name:	annexin A13
Synonyms:	ISA; ANX13
Swissprot:	P27216
Gene Accession:	BC125158
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	This gene encodes a member of the annexin family. Members of this calcium-dependent phospholipid-binding protein family play a role in the regulation of cellular growth and in signal transduction pathways. The specific function of this gene has not yet been determined; however, it is associated with the plasma membrane of undifferentiated, proliferating endothelial cells and differentiated villus enterocytes. Alternatively spliced transcript variants encoding different isoforms have been identified.
