

兔抗 HHIP 多克隆抗体

- 中文名称: 兔抗 HHIP 多克隆抗体
- 英文名称: Anti-HHIP rabbit polyclonal antibody
- 别名: hedgehog interacting protein; HIP
- 储存: 冷冻 (-20℃)
- 抗原: HHIP
- 宿主: Rabbit
- 相关类别: 一抗
- 反应种属: Human, Mouse
- 标记物: Unconjugate
- 克隆类型: rabbit polyclonal

技术规格

Background:	This gene encodes a member of the hedgehog-interacting protein (HHIP) family. The hedgehog (HH) proteins are evolutionarily conserved protein, which are important morphogens for a wide range of developmental processes, including anteroposterior patterns of limbs and regulation of left-right asymmetry in embryonic development. Multiple cell-surface receptors are responsible for transducing and/or regulating HH signals. The HHIP encoded by this gene is a highly conserved, vertebrate-specific inhibitor of HH signaling. It interacts with all three HH family members, SHH, IHH and DHH. Two single nucleotide polymorphisms (SNPs) near this gene are significantly associated with risk of chronic obstructive pulmonary disease (COPD). A single nucleotide poly

	morphism in this gene is also strongly associated with human height.
Applications:	ELISA, IHC
Name of antibody :	HHIP
Immunogen:	Synthetic peptide of human HHIP
Full name:	hedgehog interacting protein
Synonyms:	HIP
SwissProt:	Q96QV1
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human tonsil
IHC Recommended dilution:	10-50
