

兔抗 MDM2(Phospho-Ser186/Ser188) 多克隆抗体

中文名称：兔抗 MDM2(Phospho-Ser186/Ser188) 多克隆抗体

英文名称：Anti-MDM2(Phospho-Ser186/Ser188) rabbit polyclonal antibody

别名：HDMX; hdm2; ACTFS

相关类别：一抗

储存：冷冻（-20℃）避光

宿主：Rabbit

抗原：MDM2(Phospho-Ser186/Ser188)

反应种属：Human

标记物：Unconjugate

克隆类型：Unconjugate

技术规格

Background:

This gene is a target gene of the transcription factor tumor protein p53. The encoded protein is a nuclear phosphoprotein that binds and inhibits transactivation by tumor protein p53, as part of an autoregulatory negative feedback loop. Overexpression of this gene can result in excessive inactivation of tumor protein p53, diminishing its tumor suppressor function. This protein has E3 ubiquitin ligase activity, which targets tumor protein p53 for proteasomal degradation. This protein also affects the cell cycle, apoptosis, and tumorigenesis through interactions with other

	er proteins, including retinoblastoma 1 and ribosomal protein L5. More than 40 different alternatively spliced transcript variants have been isolated from both tumor and normal tissues.
Applications:	IF
Name of antibody:	MDM2(Phospho-Ser186/Ser188)
Immunogen:	Peptide sequence around phosphorylation site of Ser186/Ser188 (H-K-S(p)-D-S(p)-I-S) derived from Human MDM2.
Full name:	MDM2 proto-oncogene, E3 ubiquitin protein ligase
Synonyms :	HDMX; hdm2; ACTFS
SwissProt:	Q00987
IF positive control:	Hela cells
IF Recommend dilution:	100-200
