

兔抗 MED26 多克隆抗体

中文名称：兔抗 MED26 多克隆抗体

英文名称： Anti-MED26 rabbit polyclonal antibody

别名： CRSP7; CRSP70

相关类别： 一抗

储存： 冷冻（-20℃） 避光

抗原： MED26

宿主： Rabbit

反应种属： Human Mouse

标记物： Unconjugate

克隆类型： Unconjugate

技术规格

Background:

The activation of gene transcription is a multistep process that is triggered by factors that recognize transcriptional enhancer sites in DNA. These factors work with co-activators to direct transcriptional initiation by the RNA polymerase II apparatus. The protein encoded by this gene is a subunit of the CRSP (cofactor required for SP1 activation) complex, which, along with TFIID, is required for efficient activation by SP1. This protein is also a component of other multisubunit complexes e.g. thyroid hormone receptor-(TR-) associated proteins which interact with TR and facilitate TR function on DNA templates in conjunction with initiation factors and cof

	actors.
Applications:	WB
Name of antibody:	MED26
Immunogen:	Synthesized peptide derived from N-terminal of human MED 26.
Full name:	mediator complex subunit 26
Synonyms :	CRSP7; CRSP70
SwissProt:	O95402
WB Predicted band size:	65 kDa
WB Positive control:	LOVO cells lysate
WB Recommended dilution:	500-3000
