技术规格

Background:	The protein encoded by this gene belongs to the HMG-CoA lyase family. It is a mitochondrial enzyme that catalyzes the final step of leucine degradation and plays a key role in ketone body formation. Mutations in this gene are associated with HMG-CoA lyase deficiency. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
Applications:	ELISA, WB, IHC
Name of antibody:	HMGCL
Immunogen:	Fusion protein of human HMGCL
Full name:	3-hydroxymethyl-3-methylglutaryl-CoA lyase
Synonyms :	HL
