技术规格

Background:	GTP cyclohydrolase I feedback regulatory protein binds to and mediates tetrahydrobiopterin inhibition of GTP cyclohydrolase I . The regulatory protein, GCHFR, consists of a homodimer. It is postulated that GCHFR may play a role in regulating phenylalanine metabolism in the liver and in the production of biogenic amine neurotransmitters and nitric oxide.
Applications:	IHC
Name of antibody:	GCHFR
Immunogen:	Synthesized peptide derived from internal of human GCHFR.
Full name:	GTP cyclohydrolase I feedback regulator
