

兔抗 GDF1 多克隆抗体

中文名称：兔抗 GDF1 多克隆抗体

英文名称：Anti-GDF1 rabbit polyclonal antibody

别名：DORV, DTGA3

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：GDF1

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

This gene encodes a member of the bone morphogenetic protein (BMP) family and the TGF-beta superfamily. This group of proteins is characterized by a polybasic proteolytic processing site that is cleaved to produce a mature protein containing seven conserved cysteine residues. The members of this family are regulators of cell growth and differentiation in both embryonic and adult tissues. Studies in rodents suggest that this protein is involved in the establishment of left-right asymmetry in early embryogenesis and in neural development in later embryogenesis. This protein is transcribed from a bicistronic mRNA

	that also encodes the longevity assurance gene.
Applications:	ELISA, WB
Name of antibody:	GDF1
Immunogen:	Synthetic peptide of human GDF1
Full name:	Growth differentiation factor 1
Synonyms :	DORV, DTGA3
SwissProt:	P27539
ELISA Recommended dilution:	1000-2000
WB Predicted band size:	39 kDa
WB Positive control:	Mouse brain tissue
WB Recommended dilution:	200-1000
