

兔抗 GFRA3 多克隆抗体

中文名称：兔抗 GFRA3 多克隆抗体

英文名称： Anti-GFRA3 rabbit polyclonal antibody

相关类别： 一抗

储 存： 冷冻（-20℃）

宿 主： Rabbit

抗 原： GFRA3

反应种属： Human, Mouse, Rat

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:

GDNF family receptor alpha-3 is a protein that in humans is encoded by the GFRA3 gene. The protein encoded by this gene is a glycosylphosphatidylinositol(GPI)-linked cell surface receptor and a member of the GDNF receptor family. It forms a signaling receptor complex with RET tyrosine kinase receptor and binds the ligand, artemin. Widely expressed in adult and fetus which exhibit a similar pattern. Essentially not expressed in the central nervous system, but highly expressed in several sensory and sympathetic ganglia of the peripheral nervous system. Moderate expression in many non-neuronal tissues, particularly those of the digestive and urogenital systems, but high expression in stomach an

	d appendix. Several types of glandular tissues show low expression.
Applications:	ELISA, WB, IHC
Name of antibody:	GFRA3
Immunogen:	Synthetic peptide of human GFRA3
Full name:	GDNF family receptor alpha 3
SwissProt:	O60609
ELISA Recommended dilution:	1000-5000
IHC positive control:	Human liver cancer
IHC Recommend dilution:	20-100
WB Predicted band size:	44 kDa
WB Positive control:	Human fetal kidney and brain tissue
WB Recommended dilution:	1000-3000
