

兔抗 GH2 多克隆抗体

中文名称：兔抗 GH2 多克隆抗体

英文名称： Anti-GH2 rabbit polyclonal antibody

别名： GH1; GHV; GH-V; hGH-V

相关类别： 一抗

储存： 冷冻（-20℃）

抗原： GH2

宿主： Rabbit

反应种属： Human

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:	The protein encoded by this gene is a member of the somatotropin/prolactin family of hormones which play a n important role in growth control. The gene, along with four other related genes, is located at the growth hormone locus on chromosome 17 where they are interspersed in the same transcriptional orientation; an arrangement which is thought to have evolved by a series of gene duplications. The five genes share a remarkably high degree of sequence identity. Alternative splicing generates additional isoforms of each of the five growth hormones, leading to further diversity and potential for specialization.
Applications:	ELISA, WB, IHC

Name of antibody:	GH2
Immunogen:	Fusion protein of human GH2
Full name:	growth hormone 2
Synonyms :	GHL; GHV; GH-V; hGH-V
SwissProt:	P01242
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human colon cancer and human lung cancer
IHC Recommend dilution:	50-200
WB Predicted band size:	25 kDa
WB Positive control:	Human placenta tissue
WB Recommended dilution:	500-2000
