技术规格

Background:	AcGFP1 (<i>Aequorea coerulea</i> GFP) is a monomeric green fluorescent protein with spectral properties similar to those of EGFP. The AcGFP1 fluorescent protein is very stable, allowing you to perform studies over an extended period of time. AcGFP1 can be used to visualize and measure gene expression in a variety of organisms from bacteria to higher plants and animals.
Applications:	WB
Name of antibody:	AcGFP1
Immunogen:	Purified AcGFP1 protein expressed in HEK293 cell
Full name:	<i>Aequorea coerulea</i> GFP
WB Predicted band size:	27 kDa
WB Positive control:	HEK293T cells were transfected with the pCMV6-ENTRY

	control (Left lane) or pCMV6-ENTRY PS-CFP2 ne) cDNA for 48 hrs and lysed
WB Recommended dilution:	1000-5000
