

兔抗 NIBAN3 多克隆抗体

中文名称: 兔抗 NIBAN3 多克隆抗体

英文名称: Anti-NIBAN3 rabbit polyclonal antibody

别 名: niban apoptosis regulator 3; BCNP1; FAM129C

相关类别: 一抗

储 存: 冷冻(-20℃)

宿 主: Rabbit

抗 原: NIBAN3

反应种属: Human

标 记 物: Unconjugate

克隆类型: rabbit polyclonal

技术规格

Background:

FAM129C, also known as BCNP1, BCNP1 is a 697 amino acid protein that belongs to the Niban family. Specifically expresse d in B-lymphocytes, BCNP1 exists as five alternatively spliced isoforms. BCNP1 is highly expressed in B-cell malignancies, ly mph node and spleen, with little to no expression in other ti ssues, including other hemopoietic tissues. The gene encodin g the BCNP1 protein maps to human chromosome 19p13.11. Consisting of around 63 million bases with over 1,400 genes, chromosome 19 makes up over 2% of human genomic DNA. Chromosome 19 includes a diversity of interesting genes and is recognized for having the greatest gene density of the human chromosomes. It is the genetic home for a number of i mmunoglobulin superfamily members including the killer cell

	and leukocyte Ig-like receptors, a number of ICAMs, the CEA CAM and PSG family, and Fc? receptors. Key genes for eye c olor and hair color also map to chromosome 19.
Applications:	ELISA, IHC
Name of antibody:	NIBAN3
Immunogen:	Synthetic peptide of human NIBAN3
Full name:	niban apoptosis regulator 3
Synonyms:	BCNP1; FAM129C
SwissProt:	Q86XR2
IHC positive control:	Human liver cancer
IHC Recommend dilution:	20-100
