

ISG15 抗原（重组蛋白）

中文名称：ISG15 抗原（重组蛋白）

英文名称：ISG15 Antigen (Recombinant Protein)

别名：ISG15 ubiquitin-like modifier; G1P2; IP17; UCRP; IFI15; IMD38; hUCRP

储存：冷冻（-20℃）

相关类别：抗原

概述

Fusion protein corresponding to a region derived from 2-157 amino acids of human ISG15

技术规格

Full name:	ISG15 ubiquitin-like modifier
Synonyms:	G1P2; IP17; UCRP; IFI15; IMD38; hUCRP
Swissprot:	P05161
Gene Accession:	BC009507
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	The protein encoded by this gene is a ubiquitin-like protein that is conjugated to intracellular target proteins upon activation by interferon-alpha and interferon-beta. Several functions have been ascribed to the encoded protein, including chemotactic activity towards neutrophils, direction of ligated target proteins to intermediate filaments, cell-to-cell signaling, and antiviral activity during viral infections. While conjugates of this protein have been found to be noncovalently a

ttached to intermediate filaments, this protein is sometimes secreted
