

KAT14 抗原（重组蛋白）

中文名称：KAT14 抗原（重组蛋白）

英文名称：KAT14 Antigen (Recombinant Protein)

别名：lysine acetyltransferase 14; ATAC2; CRP2BP; CSRP2BP; PRO1194; dJ717M23.1

储存：冷冻（-20℃）

相关类别：抗原

概述

Fusion protein corresponding to a region derived from 583-782 amino acids of human KAT14

技术规格

Full name:	lysine acetyltransferase 14
Synonyms:	ATAC2; CRP2BP; CSRP2BP; PRO1194; dJ717M23.1
Swissprot:	Q9H8E8
Gene Accession:	BC009174
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	CSRP2 is a protein containing two LIM domains, which are double zinc finger motifs found in proteins of diverse function. CSRP2 and some related proteins are thought to act as protein adapters, bridging two or more proteins to form a larger protein complex. The protein encoded by this gene binds to one of the LIM domains of CSRP2 and contains an acetyltransferase domain. Although the encoded protein has been detected in the cytoplasm, i

It is predominantly a nuclear protein. Alternatively spliced transcript variants have been described.
