

## 兔抗 IGSF10 多克隆抗体

中文名称：兔抗 IGSF10 多克隆抗体

英文名称：Anti-IGSF10 rabbit polyclonal antibody

别名：CMF608

抗原：IGSF10

储存：冷冻（-20℃）

宿主：Rabbit

相关类别：一抗

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

### 技术规格

**Background:**

Ig (immunoglobulin) superfamily members exhibit functional characteristics including immune responses, growth factor signaling and cell adhesion. IGSF10 (immunoglobulin superfamily, member 10), also known as Calvaria mechanical force protein 608 (CMF608), is a 2,623 amino acid secreted protein that contains an N-terminal signal peptide, six leucine-rich repeats (LRRs), and 12 immunoglobulin-like repeats. IGSF10 exists as multiple alternatively spliced isoforms, and is expressed in bone. Specifically, expression of IGSF10 is limited to mesenchymal osteochondroprogenitors with fibroblast-like morpho

	logy, where it is thought to be involved in the maintenance of the osteochondroprogenitor cells pool and its down-regulation precedes terminal differentiation.
<b>Applications:</b>	ELISA, IHC
<b>Name of antibody:</b>	IGSF10
<b>Immunogen:</b>	Fusion protein of human IGSF10
<b>Full name:</b>	immunoglobulin superfamily, member 10
<b>Synonyms :</b>	CMF608
<b>SwissProt:</b>	Q6WRI0
<b>ELISA Recommended dilution:</b>	1000-5000
<b>IHC positive control:</b>	Human thyroid cancer and human liver cancer
<b>IHC Recommend dilution:</b>	50-200
