

兔抗 RHOC 多克隆抗体

中文名称：兔抗 RHOC 多克隆抗体

英文名称：Anti-RHOC rabbit polyclonal antibody

别名：H9, ARH9, ARHC, RHOH9

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：RHOC

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

This gene encodes a member of the Rho family of small GTPases, which cycle between inactive GDP-bound and active GTP-bound states and function as molecular switches in signal transduction cascades. Rho proteins promote reorganization of the actin cytoskeleton and regulate cell shape, attachment, and motility. The protein encoded by this gene is prenylated at its C-terminus, and localizes to the cytoplasm and plasma membrane. It is thought to be important in cell locomotion. Overexpression of this gene is associated with tumor cell proliferation and metastasis. Multiple alternatively spliced varia

	nts, encoding the same protein, have been identified.
Applications:	ELISA, WB
Name of antibody:	RHOC
Immunogen:	Synthetic peptide of human RHOC
Full name:	Ras homolog family member C
Synonyms :	H9, ARH9, ARHC, RHOH9
SwissProt:	P08134
ELISA Recommended dilution:	1000-5000
WB Predicted band size:	22 kDa
WB Positive control:	Human fetal brain tissue
WB Recommended dilution:	500-2000
