

兔抗 IL1A 多克隆抗体

- 中文名称：兔抗 IL1A 多克隆抗体
- 英文名称：Anti-IL1A rabbit polyclonal antibody
- 别名：IL1; IL-1A; IL1F1; IL1-ALPHA
- 抗原：IL1A
- 储存：冷冻（-20℃）
- 宿主：Rabbit
- 相关类别：一抗
- 反应种属：Human
- 标记物：Unconjugate
- 克隆类型：rabbit polyclonal

技术规格

Background:	The protein encoded by this gene is a member of the interleukin 1 cytokine family. This cytokine is a pleiotropic cytokine involved in various immune responses, inflammatory processes, and hematopoiesis. This cytokine is produced by monocytes and macrophages as a proprotein, which is proteolytically processed and released in response to cell injury, and thus induces apoptosis. This gene and eight other interleukin 1 family genes form a cytokine gene cluster on chromosome 2. It has been suggested that the polymorphism of these genes is associated with rheumatoid arthritis and Alzheimer's disease.
Applications:	ELISA, IHC

Name of antibody:	IL1A
Immunogen:	Fusion protein of human IL1A
Full name:	interleukin 1, alpha
Synonyms :	IL1; IL-1A; IL1F1; IL1-ALPHA
SwissProt:	P01583
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human thyroid cancer and human liver cancer
IHC Recommend dilution :	50-200
