技术规格

Background:	This locus represents naturally occurring read-through transcription between the neighboring ISY1 (ISKY1 splicing factor homolog) and RAB43 (RAB43, member RAS oncogene family) gene on chromosome 3. The read-through transcript encodes a protein that shares sequence identity with the upstream gene product, but its C-terminus is distinct due to a frameshift relative to the downstream gene.
Applications:	ELISA, WB, IHC
Name of antibody:	ISKY1-RAB43
Immunogen:	Synthetic peptide of human ISY1-RAB43
Full name:	ISKY1-RAB43 readthrough

SwissProt:	Q9ULR0
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human esophagus cancer and Human ovarian cancer
