

兔抗 WDR33 多克隆抗体

中文名称：兔抗 WDR33 多克隆抗体

英文名称：Anti-WDR33 rabbit polyclonal antibody

别名：WD repeat domain 33; NET14; WDC146

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：WDR33

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

This gene encodes a member of the WD repeat protein family. WD repeats are minimally conserved regions of approximately 40 amino acids typically bracketed by gly-his and trp-asp (GH-WD), which may facilitate formation of heterotrimeric or multiprotein complexes. Members of this family are involved in a variety of cellular processes, including cell cycle progression, signal transduction, apoptosis, and gene regulation. This gene is highly expressed in testis and the protein is localized to the nucleus. This gene may play important roles in the mechanisms of cytodifferentiation and/or DNA

	recombination. Multiple alternatively spliced transcript variants encoding distinct isoforms have been found for this gene.
Applications:	ELISA, IHC
Name of antibody:	WDR33
Immunogen:	Fusion protein of human WDR33
Full name:	WD repeat domain 33
Synonyms:	NET14; WDC146
SwissProt:	Q9C0J8
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human liver cancer
IHC Recommend dilution:	50-300
