

兔抗 SFXN1 多克隆抗体

中文名称：兔抗 SFXN1 多克隆抗体

英文名称： Anti-SFXN1 rabbit polyclonal antibody

抗 原： SFXN1

储 存： 冷冻（-20℃）

宿 主： Rabbit

相关类别： 一抗

反应种属： Human, Mouse, Rat

标记物： Unconjugate

克隆类型： Unconjugate

技术规格

Background:

The sideroflexin (SFXN) family is comprised of SFXN1, SFXN2, SFXN3, SFXN4 and SFXN5. SFXN1, also designated tricarboxylate carrier protein TCC, is the most highly characterized family member. The ubiquitously expressed SFXN1 protein resides as an integral protein of the mitochondrial inner membrane. It functions as an essential component of the shuttle system that transports mitochondrial acetyl-CoA into the cytosol, where lipogenesis occurs. The SFXN1 gene is mutated in flexed-tail (f/f) mice, which display axial skeletal abnormalities and a transient embryonic and neonatal anemia characterized by pathologic intramitochondrial

	diral iron deposits in erythrocytes. Therefore, SFX N1 is also thought to facilitate the transport of a component required for iron utilization into mitochondria. All SFXN family members show expression in pancreatic islet cells. SFXN5 displays a citrate transport activity and is primarily expressed in brain.
Applications:	ELISA, WB
Name of antibody:	SFXN1
Immunogen:	Fusion protein of human SFXN1
Full name:	sideroflexin 1
SwissProt:	Q9H9B4
ELISA Recommended dilution:	5000-10000
WB Predicted band size:	36 kDa
WB Positive control:	Human fetal liver tissue and Human cerebrum tissue
WB Recommended dilution:	200-1000
