## 技术规格

Background:	This gene shares similarity with the mouse Dhm1 an d the yeast dhp1 gene. The yeast gene is involved i n homologous recombination and RNA metabolism, such as RNA synthesis and RNA trafficking. Comple mentation studies show that Dhm1 has a similar fun ction in mouse as dhp1. The function of the human gene has not yet been determined. Transcript variant s encoding different isoforms have been noted for t his gene; however, their full-length nature is not kno wn.
