技术规格

Background:	The protein encoded by this gene is a component of the RNA polymerase I and RNA polymerase III complexes, which function in the synthesis of ribosomal RNA precursors and small RNAs, respectively. Mutations in this gene are a cause of Treacher Collins syndrome (TCS), a craniofacial development disorder. Alternative splicing results in multiple transcript variants.
Applications:	ELISA, IHC
Name of antibody:	POLR1D

Immunogen:	Fusion protein of human POLR1D
Full name:	RNA polymerase I subunit D
Synonyms:	AC19; RPA9; TCS2; RPA16; RPAC2; RPC16; POLR1C; RPO1-3
SwissProt:	P0DPB5
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human esophagus cancer and Human liver cancer
IHC Recommend dilution:	25-100
