

兔抗 ZMAT4 多克隆抗体

中文名称：兔抗 ZMAT4 多克隆抗体

英文名称： Anti-ZMAT4 rabbit polyclonal antibody

别名： zinc finger matrin-type 4

相关类别： 一抗

储存： 冷冻（-20℃）

宿主： Rabbit

抗原： ZMAT4

反应种属： Human

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:

Zinc-finger proteins contain DNA-binding domains and have a wide variety of functions, most of which encompass some form of transcriptional activation or repression. Zinc finger matrin-type protein 4 (ZMAT4) is a 229 amino acid protein that contains four matrin-type zinc fingers. The matrin-type zinc finger, which is very similar in structure to the classical DNA-binding C2H2 zinc finger, was first identified in the protein matrin-3. It has also been identified in several spliceosome RNA-binding proteins, suggesting a role in pre-mRNA binding. ZMAT4 is localized to the nucleus, and two isoforms of this protein exist as a result of alternative splicing events.

Applications:	ELISA, IHC
Name of antibody:	ZMAT4
Immunogen:	Fusion protein of human ZMAT4
Full name:	zinc finger matrin-type 4
SwissProt:	Q9H898
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human gastric cancer
IHC Recommend dilution:	50-200
