

兔抗 LAMA3 多克隆抗体

中文名称：兔抗 LAMA3 多克隆抗体

英文名称：Anti-LAMA3 rabbit polyclonal antibody

别名：E170, LOCS, BM600, LAMNA, lama4a

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：LAMA3

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

Laminins are basement membrane components thought to mediate the attachment, migration and organization of cells into tissues during embryonic development by interacting with other extracellular matrix components. The protein encoded by this gene is the alpha-3 subunit of laminin 5, which is a complex glycoprotein composed of three subunits (alpha, beta, and gamma). Laminin 5 is thought to be involved in cell adhesion, signal transduction and differentiation of keratinocytes. Mutations in this gene have been identified as the cause of Herlitz type junctional epidermolysis bullosa. Alternatively spliced transcript variants encoding different isoforms

	have been identified for this gene.
Applications:	ELISA, IHC
Name of antibody:	LAMA3
Immunogen:	Synthetic peptide of human LAMA3
Full name:	laminin, alpha 3
Synonyms :	E170, LOCS, BM600, LAMNA, lama4a
SwissProt:	Q16787
ELISA Recommended dilution:	1000-10000
IHC positive control:	Human liver cancer
IHC Recommend dilution:	25-100
