

兔抗 TRIM23 多克隆抗体

- 中文名称：兔抗 TRIM23 多克隆抗体
- 英文名称：Anti-TRIM23 rabbit polyclonal antibody
- 别名：ARD1; ARFD1; RNF46
- 抗原：TRIM23
- 宿主：Rabbit
- 储存：冷冻（-20℃）
- 相关类别：一抗
- 反应种属：Human, Mouse, Rat
- 标记物：Unconjugate
- 克隆类型：rabbit polyclonal

技术规格

Background:

The protein encoded by this gene is a member of the tripartite motif (TRIM) family. The TRIM motif includes three zinc-binding domains, a RING, a B-box type 1 and a B-box type 2, and a coiled-coil region. This protein is also a member of the ADP-ribosylation factor family of guanine nucleotide-binding family of proteins. Its carboxy terminus contains an ADP-ribosylation factor domain and a guanine nucleotide binding site, while the amino terminus contains a GTPase activating protein domain which acts on the guanine nucleotide binding site. The prote

	in localizes to lysosomes and the Golgi apparatus. It plays a role in the formation of intracellular transport vesicles, their movement from one compartment to another, and phospholipase D activation. Three alternatively spliced transcript variants for this gene have been described.
Applications:	ELISA, IHC
Name of antibody:	TRIM23
Immunogen:	Fusion protein of human TRIM23
Full name:	tripartite motif containing 23
Synonyms:	ARD1; ARFD1; RNF46
SwissProt:	P36406
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human colorectal cancer and human tonsil
IHC Recommend dilution:	35-200
