技术规格

Background:	This gene encodes a member of the sorting nexin family. Members of this family contain a phosphoinositide binding domain, which is a phosphoinositide binding domain, and are involved in intracellular trafficking. This protein does not contain a coiled coil region, like some family members. A similar protein in mouse may be involved in regulating the neurite outgrowth. Alternate splicing results in multiple transcript variants.
Applications:	ELISA, WB
Name of antibody:	SNX12
Immunogen:	Fusion protein of human SNX12
