技术规格

Background:	The protein encoded by this gene has similarity to mouse protein which is a subunit of the signal recognition particle receptor (SR). This subunit is a transmembrane GTPase belonging to the GTPase superfamily. It anchors alpha subunit, a peripheral membrane GTPase, to the ER membrane. SR is required for the cotranslational targeting of both secretory and membrane proteins to the ER membrane.
Applications:	ELISA, WB, IHC
Name of antibody:	SRPRB
Immunogen:	Full length fusion protein

Full name:	signal recognition particle receptor, B subunit
Synonyms :	APMCF1
