

兔抗 STK33 多克隆抗体

中文名称：兔抗 STK33 多克隆抗体

英文名称： Anti-STK33 rabbit polyclonal antibody

抗 原： STK33

储 存： 冷冻（-20℃）

宿 主： Rabbit

反应种属： Human

相关类别： 一抗

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:

STK33 (serine/threonine kinase 33) is a 514 amino acid protein that belongs to the CaMK (calcium/calmodulin dependent kinase) subfamily of structurally related serine/threonine kinases. Widely expressed at low levels with predominant expression in testis, lung, retina and fetal organs such as brain, heart and spinal cord, STK33 contains one protein kinase domain and functions as a Ser/Thr protein kinase with a possible role in spermatogenesis. The gene encoding STK33 lies within a region on chromosome 11 that has been associated with a variety of defects, including Long QT syndrome, T-cell leukemia, Beckwith-Wiedemann syndrome, Usher syndrome 1C and various other malignancies.

Applications:	ELISA, IHC
Name of antibody:	STK33
Immunogen:	Fusion protein of human STK33
Full name:	serine/threonine kinase 33
SwissProt:	Q9BYT3
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human liver cancer and human breast cancer
IHC Recommend dilution:	25-100
