

小鼠抗 CHGA 单克隆抗体

中文名称: 小鼠抗 CHGA 单克隆抗体

英文名称: Anti-CHGA mouse monoclonal antibody

别名: CGA

抗原: CHGA

储存: 冷冻 (-20°C) 避光

宿主: Mouse

反应种属: Human , Mouse

相关类别: 一抗

标记物: Unconjugate

克隆类型: mouse monoclonal

技术规格

Background:

The protein encoded by this gene is a member of the chromogranin/secretogranin family of neuroendocrine secretory proteins. It is found in secretory vesicles of neurons and endocrine cells. This gene product is a precursor to three biologically active peptides; vasostatin, pancreastatin, and parastatin. These peptides act as autocrine or paracrine negative modulators of the neuroendocrine system. Other peptides, including chromostatin, beta-granin, WE-14 and GE-25, are also derived from the full-length protein. However, biological activities for these molecules have not been shown. [provided by RefSeq, Jul 2008].

Applications:	WB, IHC, IF
Name of antibody:	CHGA
Immunogen:	Fusion protein of human CHGA
Full name:	chromogranin A (CHGA), transcript variant 1
Synonyms:	CGA
SwissProt:	P10645
IHC positive control:	human pancreas tissue and human liver tissue
IHC Recommend dilution:	30-150
WB Predicted band size:	51 kDa
WB Positive control:	SVT2, A549 cell lysates
WB Recommended dilution:	200-1000
