

抗 TFAP2B 多克隆抗体

中文名称：兔抗 TFAP2B 多克隆抗体

英文名称： Anti-TFAP2B rabbit polyclonal antibody

别名： AP-2B; AP2-B

相关类别： 一抗

储存： 冷冻 (-20℃)

抗原： TFAP2B

宿主： Rabbit

反应种属： Human, Mouse

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:

This gene encodes a member of the AP-2 family of transcription factors. AP-2 proteins form homo- or hetero-dimers with other AP-2 family members and bind specific DNA sequences. They are thought to stimulate cell proliferation and suppress terminal differentiation of specific cell types during embryonic development. Specific AP-2 family members differ in their expression patterns and binding affinity for different promoters. This protein functions as both a transcriptional activator and repressor. Mutations in this gene result in autosomal dominant Char

	syndrome, suggesting that this gene functions in the differentiation of neural crest cell derivatives.
Applications:	ELISA, WB
Name of antibody:	TFAP2B
Immunogen:	Synthetic peptide of human TFAP2B
Full name:	transcription factor AP-2 beta (activating enhancer binding protein 2 beta)
Synonyms :	AP-2B; AP2-B
SwissProt:	Q92481
ELISA Recommended dilution:	1000-2000
WB Predicted band size:	50 kDa
WB Positive control:	Jurkat cells
WB Recommended dilution:	200-1000
