

兔抗 TFB2M 多克隆抗体

中文名称：兔抗 TFB2M 多克隆抗体

英文名称：Anti-TFB2M rabbit polyclonal antibody

别名：transcription factor B2, mitochondrial; Hkp1; mtTFB2

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：TFB2M

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	S-adenosyl-L-methionine-dependent methyltransferase which specifically dimethylates mitochondrial 12S rRNA at the conserved stem loop. Also required for basal transcription of mitochondrial DNA, probably via its interaction with POLRMT and TFAM. Stimulates transcription independently of the methyltransferase activity. Compared to TFB1M, it activates transcription of mitochondrial DNA more efficiently, while it has less methyltransferase activity.
Applications:	ELISA, IHC
Name of antibody:	TFB2M

Immunogen:	Fusion protein of human TFB2M
Full name:	transcription factor B2, mitochondrial
Synonyms:	Hkp1; mtTFB2
SwissProt:	Q9H5Q4
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human colorectal cancer
IHC Recommend dilution:	50-200
