

兔抗 TF 多克隆抗体

中文名称：兔抗 TF 多克隆抗体

英文名称：Anti-TF rabbit polyclonal antibody

别名：TFQL1

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：TF

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

This gene encodes a glycoprotein with an approximate molecular weight of 76.5 kDa. It is thought to have been created as a result of an ancient gene duplication event that led to generation of homologous C and N-terminal domains each of which binds one ion of ferric iron. The function of this protein is to transport iron from the intestine, reticuloendothelial system, and liver parenchymal cells to all proliferating cells in the body. This protein may also have a physiologic role as granulocyte/platelet-binding protein (GPBP) involved in the removal of certain organic matter and allergens from serum.

Applications:	ELISA, WB
Name of antibody:	TF
Immunogen:	Synthetic peptide of humanTF
Full name:	Transferrin
Synonyms :	TFQTL1
SwissProt:	P02787
ELISA Recommended dilution:	2000-5000
WB Predicted band size:	77 kDa
WB Positive control:	HepG2 cells
WB Recommended dilution:	500-2000
