## 小鼠抗 SEPT2 单克隆抗体

- 中文名称: 小鼠抗 SEPT2 单克隆抗体
- 英文名称: Anti-SEPT2 mouse monoclonal antibody
- 别名: septin 2; DIFF6; NEDD5; NEDD-5; Pnutl3; hNedd5
- 相关类别: 一抗
- 储 存: 冷冻 (-20℃)
- 宿 主: Mouse
- 抗 原: SEPT2
- 反应种属: Human
- 标记物: Unconjugate
- 克隆类型: mouse monoclonal

## 技术规格

Background:	Filament-forming cytoskeletal GTPase. Forms a filamentous str ucture with SEPT12, SEPT6, SEPT2 and probably SEPT4 at the sperm annulus which is required for the structural integrity an d motility of the sperm tail during postmeiotic differentiation. Required for normal organization of the actin cytoskeleton. Pl ays a role in the biogenesis of polarized columnar-shaped epi thelium by maintaining polyglutamylated microtubules, thus fa cilitating efficient vesicle transport, and by impeding MAP4 bi nding to tubulin. Required for the progression through mitosi s. Forms a scaffold at the midplane of the mitotic splindle re quired to maintain CENPE localization at kinetochores and con sequently chromosome congression. During anaphase, may be required for chromosome segregation and spindle elongation. Plays a role in ciliogenesis and collective cell movements. In c ilia, required for the integrity of the diffusion barrier at the b ase of the primary cilium that prevents diffusion of transmem
-------------	--

	brane proteins between the cilia and plasma membranes: pro bably acts by regulating the assembly of the tectonic-like com plex (also named B9 complex) by localizing TMEM231 protein. May play a role in the internalization of 2 intracellular microbi al pathogens, Listeria monocytogenes and Shigella flexneri.
Applications:	ELISA, WB
Name of antibody:	SEPT2
Immunogen:	Fusion protein of human SEPT2
Full name:	septin 2
Synonyms:	DIFF6; NEDD5; NEDD-5; Pnutl3; hNedd5
SwissProt:	Q15019
WB Predicted band size:	41 kDa
WB Positive control:	HeLa whole cell lysate
WB Recommended dilutio n:	1000-5000
