技术规格

Background:	Putative signaling adapter which may play a role in neuronal differentiation. May be involved in regulation of NGF-dependent neurite outgrowth. Proposed to play a role in neuronal vesicular trafficking, specifically involving pre-synaptic membrane proteins. Seems to be involved in signaling pathways that are regulated by the prolonged activation of MAPK. Can regulate the polyubiquitination of IKK β and thus may be involved in regulation of the NF-kappa-B pathway.
Applications:	ELISA, IHC
Name of antibody:	RUSC1
Immunogen:	Fusion protein of human RUSC1

Full name:	RUN and SH3 domain containing 1
Synonyms:	NESCA
SwissProt:	Q9BVN2
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human colorectal cancer
IHC Recommend dilution:	50-300
