

兔抗 SERPINA7 多克隆抗体

中文名称: 兔抗 SERPINA7 多克隆抗体

英文名称: Anti-SERPINA7 rabbit polyclonal antibody

别名: TBG

抗原: SERPINA7

储存: 冷冻 (-20℃)

宿主: Rabbit

反应种属: Human

相关类别: 一抗

标记物: Unconjugate

克隆类型: rabbit polyclonal

技术规格

Background:

There are three proteins including thyroxine-binding globulin (TBG), transthyretin and albumin responsible for carrying the thyroid hormones thyroxine (T4) and 3,5,3'-triiodothyronine (T3) in the bloodstream. This gene encodes the major thyroid hormone transport protein, TBG, in serum. It belongs to the serpin family in genomics, but the protein has no inhibitory function like many other members of the serpin family. Mutations in this gene result in TBG deficiency, which has been classified as partial deficiency, complete deficiency, and excess, based on the level of serum TBG. Alternatively spliced transcript variants encoding different

	nt isoforms have been found, but the full-length nature of these variants has not been determined.
Applications:	ELISA, IHC
Name of antibody:	SERPINA7
Immunogen:	Full length fusion protein
Full name:	serpin peptidase inhibitor, clade A (alpha-1 antitrypsin), member 7
Synonyms :	TBG
SwissProt:	P05543
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human liver cancer and Human prostate cancer
IHC Recommend dilution:	25-100
